By Craig Boddington : Where Lions Roar: Ten more years of African Hunting want to save a lion lions have disappeared from 80 percent of their african range where once they presided over vast ecosystems now their roars are silenced their a lions roar can be heard from more than 5 miles 8 kilometers away both male and female lions roar with

cubs beginning to roar at about age 1 Where Lions Roar: Ten more years of African Hunting:

2 of 2 review helpful Good read but not a must read By S T McCann Where Lions Roar is a good read but it isn't one of Craig Boddington's best efforts. The book lacks a consistent tone. Some of the chapters read like a personal hunting journal some like an interoffice memo and some are classic safari tales. Too many chapters are consumed with personal minutiae about why he was on the safari what article he was working on. From the steaming jungles of the Congo basin in search of the elusive bongo to the arid bushveld of Zimbabwe for leopard Boddington pursues a large array of animals. America's most popular international hunter tracks after such exotic animals as the mountain nyala giant forest hog sitatunga giant eland and a host of other game with unusual names. From the Publisher Finally Craig Boddington's long awaited sequel to From Mt Kenya to the Cape is here the story of Boddington's hunts in the Dark Continent during the last ten years. Since writing his first African book he has shot big game in Ethiopia the
