2 of 2 review helpful One of the Best Beginning Tracking Books Out There By John Sensenstein I have to agree with the rest of the reviewers giving their opinions At first I was put off by the price and most reviewers are not really that competent to properly review the merits of a book But in this case I was pleasantly mistaken This is an outstanding book not only for beginner trackers but for hunters a Tracking is an art form as well as a skill But it is an art that can be taught and a skill that can be acquired Cleve Cheney a master at tracking both animals and humans defines tracking as "learning to use all your senses to monitor your surroundings and to make logical and realistic deductions from what you have observed" He has brought together a massive amount of information on the how when and where of tracking About the Author Cleve Cheney is an instructor at the Southern African Wildlife College
